

## Verification Api

### Verify PAN

PAN Verification feature enables you to instantly verify customer PAN details of individuals or businesses before you onboard them or make any transactions with them. The feature helps you to validate if a particular PAN is valid.

You can use the PAN verification feature for various purposes, such as:

- Onboarding vendors
- Onboarding employees
- Transferring funds or process payments
- Required for KYC verification

### End Points

      "name_match_result": "NO_MATCH"
    }
  }
}
```

```
}  
}
```

## Aadhaar Verification

Aadhaar number is a unique 12 digit number used to verify an individual's identity. Aadhaar Verification is a crucial part of the customer onboarding process for various platforms like NBFCs, Banks, Lending companies, Insurance companies. Aadhaar verification is also a part of the employee onboarding process for every business.

}
```

## GST Verification

GSTIN is a Goods and Services Tax Identification Number that is assigned to each person registered under GST. It is a 15-digit unique identification number.

**GSTIN Format** - The first 2 digits of the 15 digit GSTIN represents the state code. The next 10 digits are the PAN number of the person or the business entity. The thirteenth digit is based on the number of registrations done by the firm within a state under the same PAN.
